## The Top 100 Venture-Backed Companies

More than 10,000 companies get off the ground each year; less than two percent of these actually receive venture funding. Now, *Venture Reporter* has pared this list down even further, to the world's 100 most successful companies to have received Series A or seed round financing during the past 18 months.

**\$695**

This **80-page report** examines these companies through:

- Five-year revenue projections and expected breakeven dates for each company
- Detailed profiles that describe each company's strengths and include concrete statistics on the management teams' plans for their companies' new funding
- Contact information, including e-mail addresses, for more than 500 top managers of these companies
- Detailed track records and educational backgrounds of each CEO as well as information on other management team standouts
- Informative analyses of the markets these companies hope to tap, including information about potential rivals
